🦉 THE GITCOIN WEEKLY 🦉

Hi folks 👋

The Gitcoin Core Team continues to grow with the addition of Mark Beacom, early Gitcoin developer. Mark is intimately familiar with our repo's and will have an immediate impact on the team. **Welcome, Mark!**

Alongside fellow Gitcoiner Jason Haas, one of the first projects Mark has driven is the integration of Standard Bounties. Integrating our smart contracts with Bounties Network has long been a strategic goal of Gitcoin's in order to bringing security, interoperability, and a richer feature-set to Gitcoin. We couldn't be more excited about what this development can bring for the future of the Gitcoin platform.

The Standard Bounties contracts bring updates to the Gitcoin user experience, so please read through the article and let us know if you have any questions by reaching out on slack or on Github.

Back to coding ! 🤖
